

Develop State/NOAA Coordination & Technical Support

May 2000 Status Report

- 1) The full windows version of the HTDB/us has been almost completed. Some work remains to be done, mostly cleaning up errors discovered in the location of sites in the heights data base.
- 2) The current year's contract with the Novosibirsk Tsunami Laboratory provides for the development of a beta version of the HTDB/US for the Caribbean.
- 3) Expect to distribute proposed changes to the WC/ATWC message formats for comment in very early June.
