

Tsunami Hazard Mitigation

A subcommittee of the Tsunami Hazard Mitigation Federal/State Steering Group met at the conclusion of the meeting to discuss strategies for implementation of first year Tsunami Mitigation efforts. Representatives from Oregon, California, Alaska, and Hawaii attended. It was decided that a representative from each state would make detailed suggestions on how to meet the objectives stated in the Initiative and would include possible resources and talent within their state capable of carrying out these efforts. Lori Dengler will attempt to consolidate the State contributions in a form that the subcommittee could work into a final implementation plan to be approved at the next meeting.
